SAND

Description:

Cutting edge design

The SAND collection is a cutting-edge design inspired by nature. The main inspiration is the way water transforms and shapes stone over time, and the way sand constantly creates new shapes. The SAND collection is unique and functional furniture that create a comfortable and peaceful setting.

Year of design: 2010

Function:

SAND collection consists of three pieces of furniture:

Lounge chair, sofa chaise long and pouf, that makes it possible to create many great arrangements with beautiful design.

Design: Javier Moreno

Since 2010 Javier Moreno has been designing for SOFTLINE and his design philosophy is that design should be something that matters. In a time when everything is becoming immaterial and increasingly virtual, he believes that humans still need physical and aesthetical objects in their daily lives. Javier Moreno is meticulous in his design process and works to get the maximum of using less. His approach is clear, simple and focusing on the humans who will use the furniture.
